SMART STOR-IT™

for triage that works

STOR-IT

The **Stor-It** is an extremely well organised solution for the bulk storage and rapid deployment of medical equipment. Made to the highest specification the **Stor-It** is designed specifically for disaster and emergency response but has been shown to be highly effective at aide stations during mass gathering events.

The **Stor-It** range has a 15 year "no questions asked" guarantee.

This rugged storage system has triple reinforced stitching & exterior padding to protect fragile medical equipment during storage, transport and shipment.

STOR-IT STAND

Lightweight portable solution for hanging the **Stor-It** in any situation.

INSERT-IT

This small shoulder pac fits inside the **Stor-It** for transport and storage, and is ideal for small items such as vials, single dose medications and drugs and once deployed allows simple removal from an un-secure site.

INSERT-IT LONG

An additional 10 pockets for storage, the **Insert-It** long fits inside the **Stor-It** or can be used in isolation. Shoulder strap and carrying handle allows for rapid, simple deployment on scene.
